

Sakai Integration

Learning Management System Course Evaluation Connector

The Sakai integration for Class Climate makes it more convenient for students and instructors to access their course evaluations from their Sakai home page. The integration is available as a Learning Tools Interoperability (LTI) connector

Together, Class Climate and Sakai work to increase student response rates and to encourage honest feedback.

The **student portal** provides each student with a list of their open online evaluations.

Each survey opens in a new browser window. After students complete a survey, the window displays which evaluations they have completed and which are pending, so they can complete all their evaluations at once.

The **instructor portal** provides a list of each instructor's classes, showing the evaluation response rate and providing access to the most current results report.

Did You Know?

- Your survey results are anonymous!
- Every survey has a minimum number of students who must respond in order for instructors to receive a summary report. This further protects your anonymity.
- We encourage you to participate and help your university understand instructional effectiveness and plan continuous improvement initiatives.
