

D2L® Integration

Learning Management System Course Evaluation Connector

Class Climate's D2L integrations make it more convenient for students and instructors to access their course evaluations from their Brightspace or Desire2Learn home page. The integrations are available as a Learning Tools Interoperability (LTI) connector for Brightspace and Desire2Learn.*

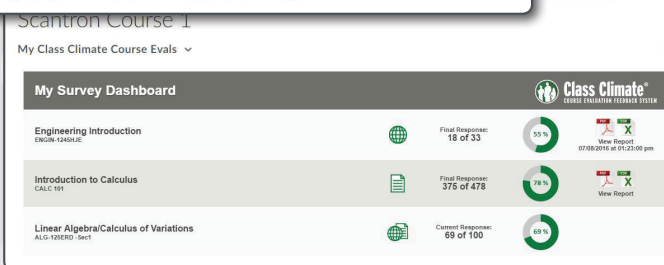

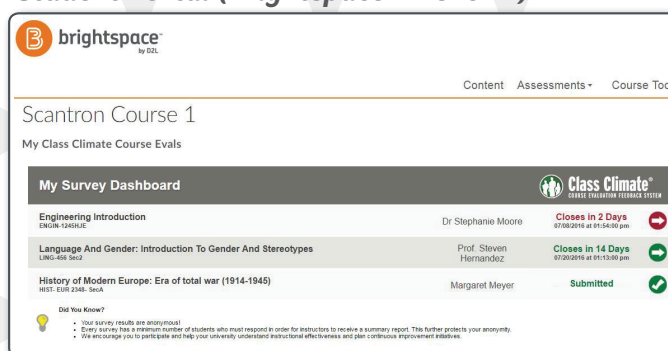

Together, Class Climate and Brightspace work to increase student response rates and to encourage honest feedback.

The **student portal** provides each student with a list of their open online evaluations.

Each survey opens in a new browser window. After students complete a survey, the window displays which evaluations they have completed and which are pending, so they can complete all their evaluations at once.

The **instructor portal** provides a list of each instructor's classes, showing the evaluation response rate and providing access to the most current results report.

*This brochure discusses only the Brightspace LTI connector. For information about the Desire2Learn LTI connector, please contact your Scantron representative.

“We love this added integration because in addition to the students receiving initial emails and reminder emails through Class Climate directly, they are also able to see and complete the evaluation(s) right from within Desire2Learn.”

*Jennifer Hendryx, Instructional Designer
University of Wisconsin Colleges Online*
