

Class Climate 7.1 Plug-ins Summary

Last Changes Dashboard

As the administrator or subunit administrator, you can now keep an overview of the last changes in the system with the **Last Changes Dashboard**. The new plug-in displays the latest activities bundled on the Dashboard. This helps you among other things to identify which surveys were last created, which surveys have received new data and which questionnaires were recently manipulated.

Dashboard: Last Changes

Last created surveys

Survey	Instructor	Period	Subunit	No. of responses	Creation date
TEST COURSE 1	DALGOBBO	SS 16	Demo Subunit	0	23.05.2016
MERGE 1	DALGOBBO	SS 16	Demo Subunit	0	23.05.2016
MERGE 2	DALGOBBO	SS 16	Demo Subunit	0	23.05.2016
Web Design\HTML 1 (DEMO172)	Donna Harwood	WS 14/15	Demo Subunit	0	17.04.2014
Web Design\HTML 1	Donna Harwood	WS 14/15	Demo Subunit	0	17.04.2014

Bring Your Own Device

With the plug-in **Bring Your Own Device**, Class Climate ‘passive’ instructors receive the ability to conduct an in-class online survey. They receive a list of centrally provided surveys and can start the survey immediately. Via a QR-code, which can be shown in the room with a projector, students can give instant feedback. Instructors are also given the possibility to trigger the distribution of PSWDs, which e-mails students access to the online survey.

Bring Your Own Device

Following surveys are available:
 Use the blue arrow icon to get a full-screen display showing the link to this survey as QR code and tiny URL.

Survey	Period	Creation date
Bring my own survey test	SS16	2017-04-13

 Bring my own survey test

Find My Questionnaire

With the plug-in **Find My Questionnaire**, you can find questionnaires with certain search criteria quickly and easily via a search field. You can open the questionnaire details directly from the search result, without having to click through all other questionnaires in the system.

Find my questionnaire

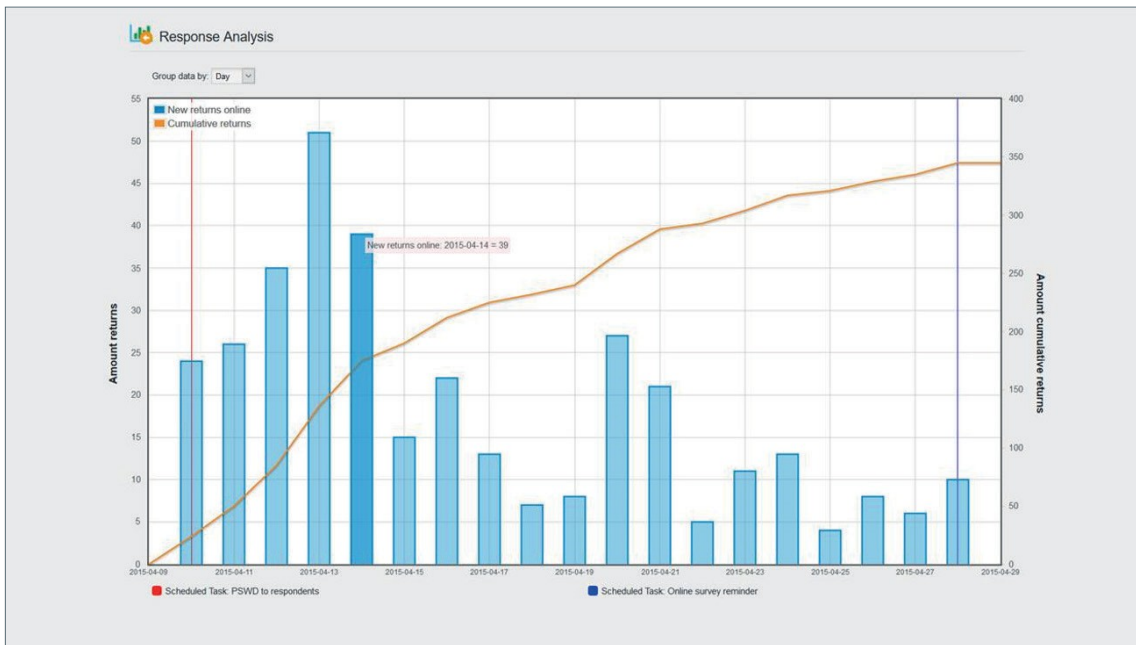

Enter the title, abbreviation or ID of the questionnaire. As placeholder for a character, you can use an asterisk (*) and as placeholder for multiple characters the percentage sign (%).

sample Search

ID	Abbreviation	Title	Creator	Folder	Creation date	Last modification

Response Analysis

The new plug-in **Response Analysis** gives you a quick overview of the development of responses to online surveys. The new item “Response Analysis” appears in the survey details. A diagram with a time axis and the number of responses per day, month is displayed. This way you receive information on how many respondents participated in the survey on which days.

Historical Data Import

With this new plug-in, the Historical Data Import can be easily done. Via a CSV-file, result data from existent classes can be imported with just a few clicks. The prerequisite is that a corresponding questionnaire has been created with which the result data can be put into relation. If necessary, surveys that fit the historic result data can also be created in retrospect to allow for a comparative survey of participants of existing classes.

The screenshot shows the Class Climate web application interface. At the top, there is a navigation bar with the following tabs: SUBUNITS (selected), QUESTIONNAIRES, SYSTEM SETTINGS, SYSTEM INFORMATION, and EXTRAS. On the left side, there is a sidebar menu. The top section of the sidebar is labeled 'Class Climate Admin' and shows the user 'Administrator'. Below this, there are two main sections: 'SUBUNITS' and 'CENTRAL EVALUATION'. Under 'SUBUNITS', there are links for 'Overview', 'Demo Subunit', and 'Sample Neutral ...'. Under 'CENTRAL EVALUATION', there are links for 'Tree Structure', 'Generate Surveys', 'Display Surveys', and 'Delete Surveys'. The main content area is titled 'Historical Data Import'. It contains a 'Raw Data CSV file:' section with a text input field containing 'No file selected' and a blue 'Search...' button. Below this is a 'Questionnaire:' section with a dropdown menu showing 'CRS2PLE3'. Underneath is a 'Period:' section with a dropdown menu showing 'WS16/17'. At the bottom of the main content area, there is a green 'Import' button.

Download Log Files

You can download the latest log files with the plug-in **Download Log Files**. These are provided as a ZIP archive. Thus, laborious searches for log files for the processing of support cases are not necessary anymore.

Download log files

Here you can download a ZIP archive with log files from the server which can be used for problem analysis. Please note, that these files may contain sensitive personal data.
