Installation Notes

- IIS must be setup and configured before the installing ParTest Online.
- In the Advanced settings of the IIS app pool, the Enable 32-bit applications setting should be set to **True**.
- Websites should be created before the installing ParTest Online.

Additional Notes

- Web Servers: If any preinstalled software (for example, a Web server) is running on the server that will host ParTest Online, problems may arise during the installation. We strongly recommend using a dedicated server for ParTest Online. If this is not possible, notify Scantron about any preinstalled software.
- UAC compliant.
- Administrator rights required to install and uninstall ParTest Online.
- Virtualized server environments are supported.
- Accessing ParTest Online from browsers running on virtual machines is supported.
