

Make Evidence-Based Decisions with Stakeholder Surveys

Today's educational environment requires a broader approach to assessment. Federal and state requirements now include measures of student, educator, or community feedback. My Student Survey has been a national leader in stakeholder surveys since 2010. Scantron is working with My Student Survey to bring insights to schools across the country and connect stakeholder results with insights from Scantron's assessments to improve student and educator success.

Scantron and My Student Survey: Your Survey Partners

Our experts know more than surveys—we're also former educators. We know the struggles you face to make meaningful improvements and create the best environment possible for your students.

That's why our experts in educational surveys work closely with you to make sure your survey delivers the results you need so you can make evidence-based decisions to improve your schools.

We provide an easy and efficient survey solution:

- **Questions and scales are designed to maximize objectivity based on frequency of best practices rather than subjective opinion.**
- **Online, mobile app, and paper surveys plus multiple languages to support your survey administration needs.**
- **Screening to eliminate invalid responses so that only fair and purposeful student responses are included.**
- **Detailed feedback reports you and your teachers can use for differentiated professional development.**

Options to Measure Opinion

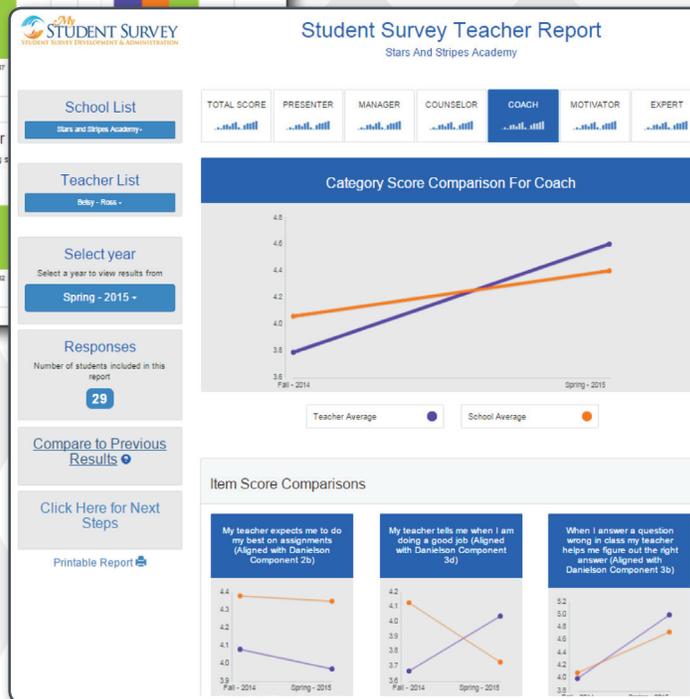

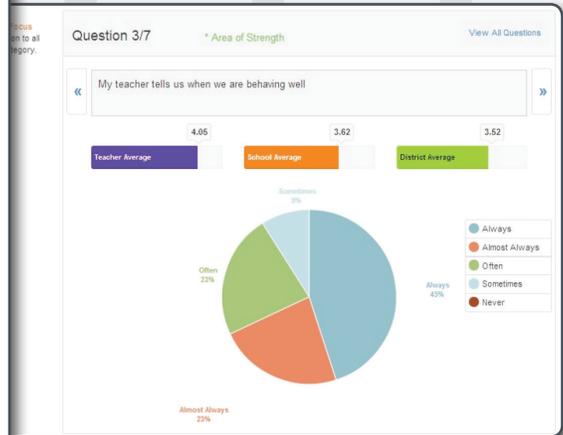

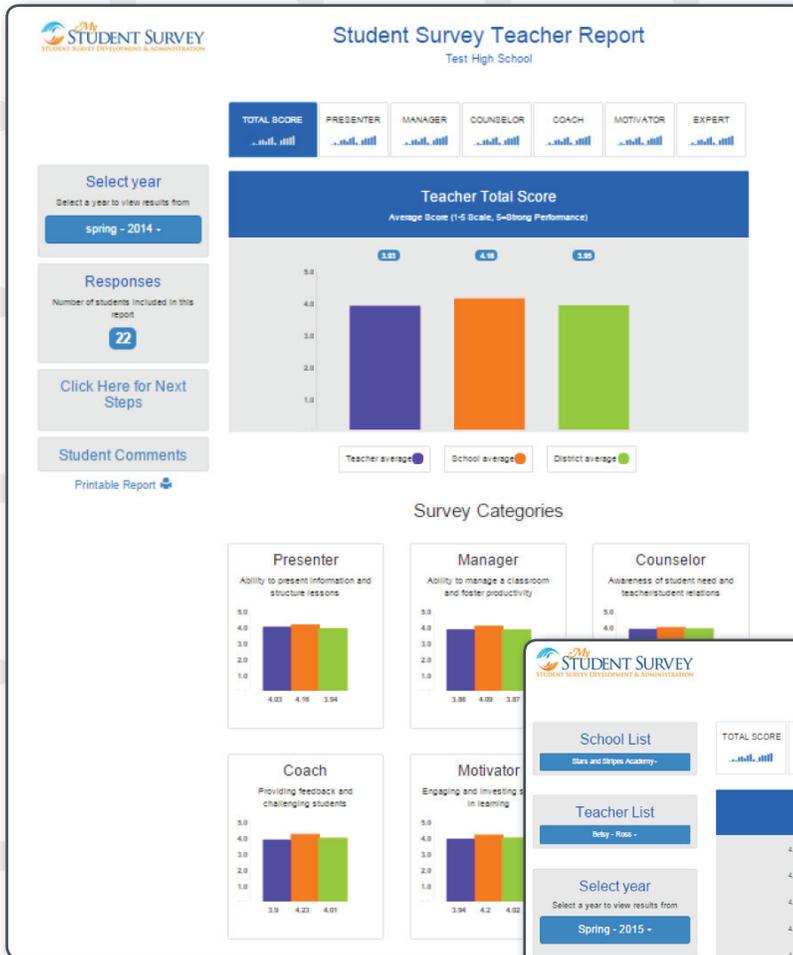

My Student Survey provides a robust suite of survey measures you can use to drive school improvement.

- **STeP Survey** In grades 3–12, student opinion of instruction can be a reliable predictor of achievement. This survey presents student-oriented, validated questions regarding common teacher activities from classroom management to feedback on assignments.
- **Climate Survey** A positive school environment contributes directly to student achievement. This survey helps you discover what students and parents think about your schools' climate.
- **Parent Engagement** Engaged parents correlate to engaged students. This survey asks parents about their current engagement so you can use those results to design programs to bring them closer.
- **Staff Survey** Your staff is a key component in any school improvement effort. This survey asks key questions that uncover insights about staff morale so you can identify changes and work with your team to implement them.

“It is our pleasure to provide the highest recommendation possible for My Student Survey and their great ability to provide student surveys to Metropolitan Nashville Public Schools, a district with more than 150 schools and 86,000 students.”
